What Happens When DLP Triggers

DLP POLICY TIP – WHAT YOU'LL SEE

When you type sensitive information in Teams chat:

 This message may contain sensitive information.
Use secure channels for PII or credentials.

[Acknowledge and Send] [Cancel]

YOUR OPTIONS:

1. ACKNOWLEDGE AND SEND

- Message sends with acknowledgment logged
- Use only if legitimate business need

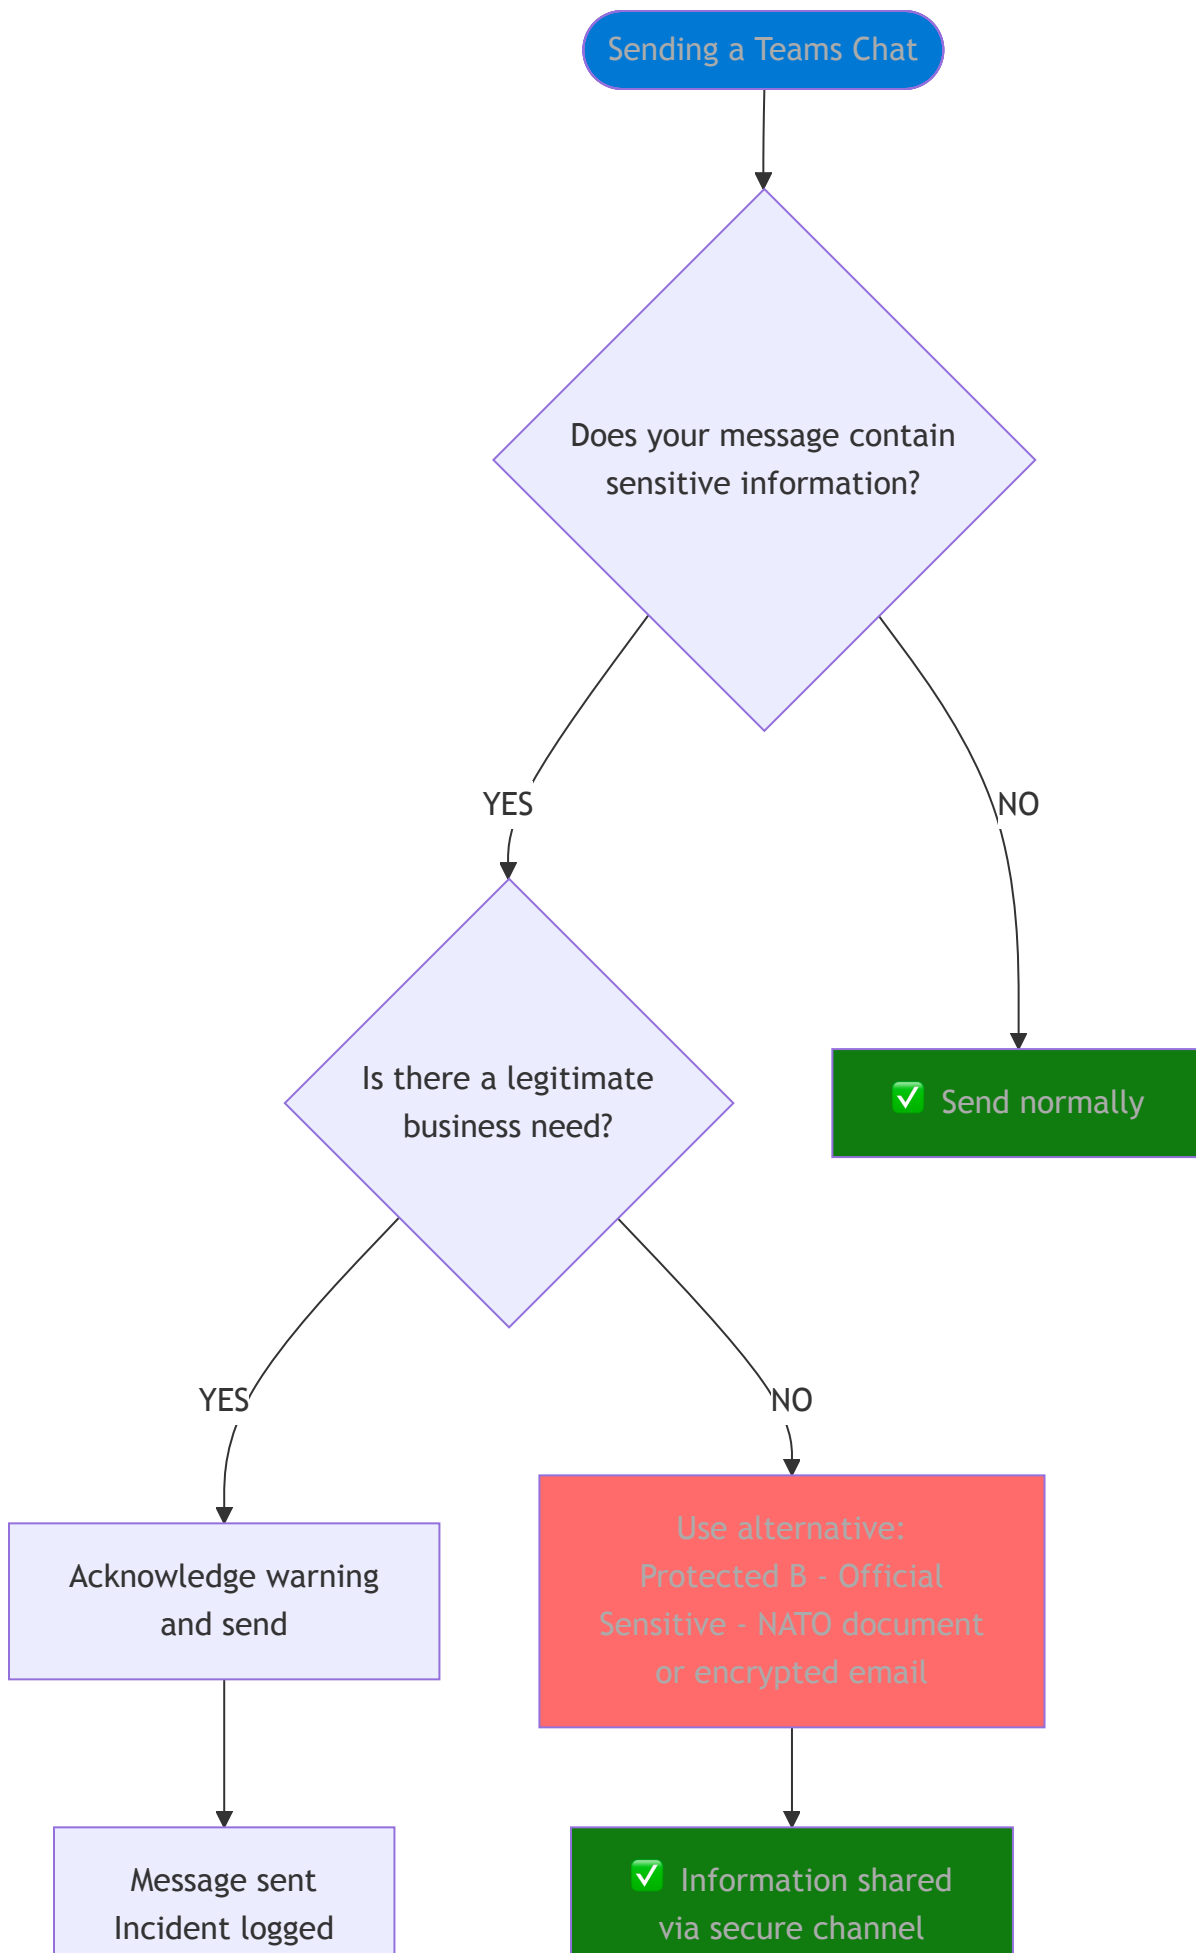

2. CANCEL

- Edit or delete the sensitive content
- Consider using a labeled document instead

BEST PRACTICE:

- Put sensitive info in a Protected B – Official Sensitive – NATO document
- Share via email
- Chat is for quick communications, not PII

PART 5: SHAREPOINT SITES

Site-Level Labels

SHAREPOINT SITE LABELS

Site-level labels are applied by administrators.
They control:

- External sharing settings
- Guest access permissions
- Privacy settings (public/private)
- Default document label (optional)

PROTECTED B – OFFICIAL SENSITIVE – NATO SITES:

- External sharing: Restricted
- Guest access: Controlled
- All documents inherit site protection

 You still need to label individual documents!
Site labels protect the container, document labels protect the content.

PART 6: CUSTOMER MANAGED KEYS (CMK)

What's Protected

 ENHANCED ENCRYPTION – CUSTOMER MANAGED KEYS

All Microsoft 365 data is now encrypted with Leonardo Canada-controlled encryption keys.

SERVICE	STATUS
Teams Chat & Meetings	 Leonardo keys
Teams Voicemail	 Leonardo keys
Exchange Email & Calendar	 Leonardo keys
SharePoint Online	 Leonardo keys
OneDrive for Business	 Leonardo keys

WHY THIS MATTERS:

- Data sovereignty: Keys stored in Canada
- Control: Leonardo can revoke access if needed
- Compliance: Meets Protected B – Official Sensitive – NATO requirements
- Transparency: Full audit trail of key usage

 No action required from you – this is automatic!

COMMON MISTAKES TO AVOID

WRONG THINKING:

"It's just internal"

- Internal ≠ Not Sensitive
- Check content, not audience

"It's just a quick chat"

- DLP monitors ALL chats
- Use documents for sensitive info

"I'll label it later"

- Label FIRST, before saving
- Prevents accidental sharing

"The attachment is labeled, so the email is fine"

- Actually TRUE! Email inherits label
- But verify before sending

"It's just a draft"

- Drafts can be shared accidentally
- Label from creation

CORRECT THINKING:

"What's the content?"

- Content determines label (always)

"Is this covered by NDA/contract?"

- Yes = Protected B – Official Sensitive – NATO (everywhere)

"Would I put this on a billboard?"

- No = Protected B – Official Sensitive – NATO

"When unsure..."

→ Protected B – Official Sensitive – NATO (all applications)

"Sensitive data in chat?"

→ Use Protected B – Official Sensitive – NATO document instead
